DECLARATION OF TERESA A. GOLDEN AND ANIMESH RAY
UNDER 37 C.F.R. §1.131

U.S. Patent and Trademark Office
P.O. Box 2327
Arlington, VA 22202

Dear Sir:

WE, TERESA A. GOLDEN and ANIMESH RAY, pursuant to
37 C.F.R. § 1.131, declare:

- Consolidated*
JZ
1/5/03
1. We are co-inventors of the above patent application.
 2. It is our understanding that some of the claims of our above-referenced patent application are rejected as anticipated by the sequences deposited as accession number AC007323 by J.R. Ecker of the *Arabidopsis thaliana* Genome Center, Department of Biology, University of Pennsylvania ("Ecker").
 3. NCBI, the publisher of GenBank accession submissions, has advised us that accession number AC007323 was released to the public on April 19, 1999.
 4. Prior to April 19, 1999, we conceived and reduced to practice in the United States the full-length cDNA sequence (6184 b.p.) of the Short Integuments1 ("SIN1") gene and the corresponding amino acid sequence of the SIN1 protein encoded by that gene, which we cloned from *Arabidopsis thaliana*. Evidence of this reduction to practice is found in attached Exhibit 1, which is a true copy of our laboratory records, showing the DNA Strider™ sequence record of the SIN1 gene, and the predicted SIN1 amino acid sequence.
